Make sure all your nurses are safe to care with Group Access to Nursing Times:
Nursingtimes.net/subscribe/groupaccess
Your challenge
Is to fill nursing posts and ensure that your workforce is providing safe, high-quality care to all your patients. Your organisation is under pressure to meet national targets, pass inspections and your board seeks reassurance that you are not at risk of being the next scandal-hit organisation.

The solution, Nursing Times Group Access

1. Demonstrates your organisation’s commitment to patient safety and care. 86% of nurses said they would make significant changes to their practice as a result of studying a Nursing Times Learning Unit.*

2. Offers invaluable support in hiring, retaining and revalidating your competent nursing workforce. There are over 40 Nursing Times Learning units that will help to educate and motivate your nurses.

3. Gives your board reassurance of staff competence in the fundamentals of care. Nursing Times Group Access provides a reporting system that enables you to see which nurses have passed the units, and which need further support.

4. Provides you with evidence that individual staff have engaged in the essential learning and are competent. Nurses do a test at the beginning and end of each learning unit so you can verify how much they have learnt; 92%; of users said the learning was very effective.*

5. Is a surprisingly cost-effective solution for training and motivating all your staff to provide high-quality care. Our online learning units are excellent value for money and with no backfill costs or travel expenses; they enable you to provide education for every nurse.

*199 users surveyed over the past three months.
Nursing Times Group Access is the most cost-effective way to help you deliver safe nursing care for patients across your organisation. We help you give your board assurance that all your nurses are competent in the fundamentals of care.

Meet PREP requirements and ensure your nurses can stay on the register post-revalidation with unlimited access to over 40 Nursing Times Learning units written by nationally recognised experts, each worth at least two hours of CPD. Most popular learning units include Drug Calculations in Practice, Nutrition Screening, Record Keeping and Pressure Ulcer Prevention.

Ensure you know which of your staff need extra support and training with a reporting system that identifies who has passed which units, and who needs extra help to be safe to care.

Be at the forefront of best practice with access to 5,000 double-blind peer reviewed practice articles on nursingtimes.net, from expert nurses.

Stay up to date with the latest news, events and key developments across healthcare, with online access to Nursing Times.
